Publisher's Description: Presentation  
creation with no effort at all! iSpring  
Presenter enables you to create  
presentations of any complexity  
without you having to create and  
insert the slides yourself. It

---

automatically generates all the slides and all the text and graphics you need. All you have to do is to choose a template from our library and select your slides from a predefined list of slides. The application is very simple and straightforward, which makes it very easy to use. Moreover, iSpring Presenter supports the most recent Office versions. You can use any Microsoft Office format as a source document (i.e. Word, Excel, PowerPoint, Visio or Publisher). In addition, it supports HTML and other web-based templates. Besides,

---

it allows you to combine different types of slide materials into a single presentation with just a few clicks. It can automatically generate a PDF file, a Microsoft PowerPoint document or a standard HTML page, all of which are compatible with PowerPoint. All of these are completed automatically. No additional format conversion is required. iSpring Presenter supports all the predefined slide types (Tables, Graphics, Videos, Text) and can import data from various sources such as Microsoft Excel, Microsoft

---

Word, Microsoft Publisher, Visio, HTML and others. Please note that iSpring Presenter is only available for the PC. iSpring Presenter has been updated on 11/13/2017. iSpring Presenter is also known as:

iSpring.com: Presentation generator for Word, Excel, PowerPoint and Publisher

iSpring Presenter Features:

- No coding required
- Auto-detects different document formats such as HTML, Microsoft PowerPoint, Microsoft Publisher, Microsoft Visio and Microsoft Word
- Supports most of the templates in our library

---

Generates audio and video files automatically - Custom slide layouts - Multiple slide formats - Auto-generates table lists, forms and other slides - Supports the integration of web content - Supports all the latest Microsoft Office versions

Generating high-quality presentations can be a quite difficult task, especially if your audience has high expectations. Choosing an item from a template library can yield you quick, yet average positive feedback. Fortunately, you can rely on third-party software if you want to generate advanced, eye-catching presentation. iSpring Presenter is one of the applications that can help you if you are in the situation above. Note that since it is a Microsoft

---

PowerPoint add-in, it requires the application in order to be installed and launched properly.

Comprehensive interface with multiple reliable features This add-in provides you with various ways of enhancing your projects without complicating its layout. Therefore, most of the users who have previous experience with presentation creation software can understand it and benefit from its functions entirely. However, you cannot access a traditional configuration window, since most of its customizable

---

parameters can be modified from the main window with minimum difficulty. Insert videos, audio recordings, quizzes or YouTube content within your presentations. You can rely on this application if you need a convenient way of enriching your presentations by importing various events within it. It is possible to add video clips, audio recordings, custom quizzes, YouTube videos or web objects directly on your projects. If you own supported hardware, you can generate video and audio content that

---

you can insert into your file. This add-in allows you to split your document into multiple chapters and assign different narrators to each part. Narrators can be created by accessing the corresponding option and typing in the required details, such as name, title, company or website, and attaching pictures, according to your preferences.

Organize your presentations with the integrated Narration Editor tool

After generating your presentation, you can manipulate it further by accessing a handy tool that allows

---

you to edit it similarly to a video project. Each part of your document (e.g. slides, videos or audio recordings) can be found under separate categories. To sum it up, iSpring Presenter is a reliable PowerPoint add-in that allows you to generate high-quality presentations by providing you with numerous handy features. Screenshots Reviews A nice app! 5 By Yolanness I would recommend this app to anyone who is looking to create some fancy presentation/s. No more than one item 3 By Jean-Noel Doesn't open all

---

the items I have selected. Great Add-
